The PLUS PLAN Includes:

Three (3) annual services: Winterization, Spring Turn-on and one Summer Assessment. Repair or replacement of any part of your sprinkler system (except pumps and their related components) that no longer functions — see PLUS PLAN Costs & Deductibles below.

The PLUS PLAN Excludes:

a) Pre-existing and current damage; b) Damage by others; c) Moving/raising of any system components; d) Backflow assemblies; e) Pumps and their components; f) Acts of God; and g) Repairs by others

PLUS PLAN Costs & Deductibles:

PLUS Annual Cost of \$405 for three (3) annual services for systems up to six (6) zones as listed in above table.

\$95 per-component deductible for repair or replacement of up to six (6) heads, internal valve components, sensors, controller modules, one minor lateral pipe leak.

\$300 per-component deductible for excavation (meter tie-in, valve manifold, etc.), conventional controller, flow meter, main line leaks requiring excavation by hand only (machine excavation or trenching will be billed separately), replacement of up to ten (10) heads, troubleshooting including electrical repairs.

The homeowner is responsible for reporting issues with completed service work within 72 hours to avoid additional service/return trip charges, including adjustments for sprinkler heads and controller programming.

Hydro-Tech Irrigation Residential Sprinkler Service Plans

BASIC SERVICE PLANS (BSP) — This two (2) service per-year plan includes winterization and spring turn-on services (does not include checking of rain sensor). *Any additional repairs shall be done on a time and materials basis.*

PLUS SERVICE PLAN (PSP) — The Plus Service Plan (PSP) includes three (3) annual services: winterization, spring turn-on (does not include checking of rain sensor) and one summer assessment. The plan offers the most comprehensive sprinkler system coverage in the industry. In addition to including all the benefits offered by our Basic Service Plan (BSP), the PSP protects you against the vast majority of sprinkler system failures - both expected and unexpected. Coverage includes normal wear and tear and freeze breaks related to winterization services. A detailed list of included services, exclusions, costs & deductibles are listed in the Residential Services Price List section of this brochure.

The only fees, in addition to the cost of the three (3) annual services are per-component deductibles (see Residential Services Price List) and the cost of the backflow inspection.

Note that prior to enrolling in PSP coverage, the sprinkler system must be inspected in-person by our technician and currently operational, and all pre-existing damage must be fully repaired.

SPRINKLER SERVICE PLANS COMPARISON (Residential Only)
